Worked in Advanced Technology Group (ATG) to develop approaches for spatial audio generaton

SF, USA

- Proposed a novel task and a flow-matching generative approach for ambisonics generation from scratch.
- $\circ$  Outperformed traditional baselines on objective (FAD  $\sim 72\%$ ) and subjective metrics (Fidelity  $\sim 60\%$ ).

#### Nvidia | Deep Learning Intern

May 2022 - Aug 2022

Worked in Product Security team to efficiently detect anomalous user-behavior in AWS accounts

Remote, USA

- Developed and implemented a multi-task autoencoder that replaced up to 10 production models.
- Improved existing intrusion detection system by 65% (F-score) and reduced false positives by 50%

## Zomato | Machine Learning Engineer II

July 2018 - April 2021

Part of Search, User personalization, and Logistics teams

Gurgaon, India

- Improved auto-suggestion search by 10% avg. rank, 4% CTR & 2% OTR using point-wise ML model
- Created DQN RL based rider dispatch service, improving next order time(3min) & order probability(9%)
- Developed similar restaurants service by creating restaurants' embedding using modified Word2Vec
